Passenger, Freight, Carriage and Hand ELEVATORS,

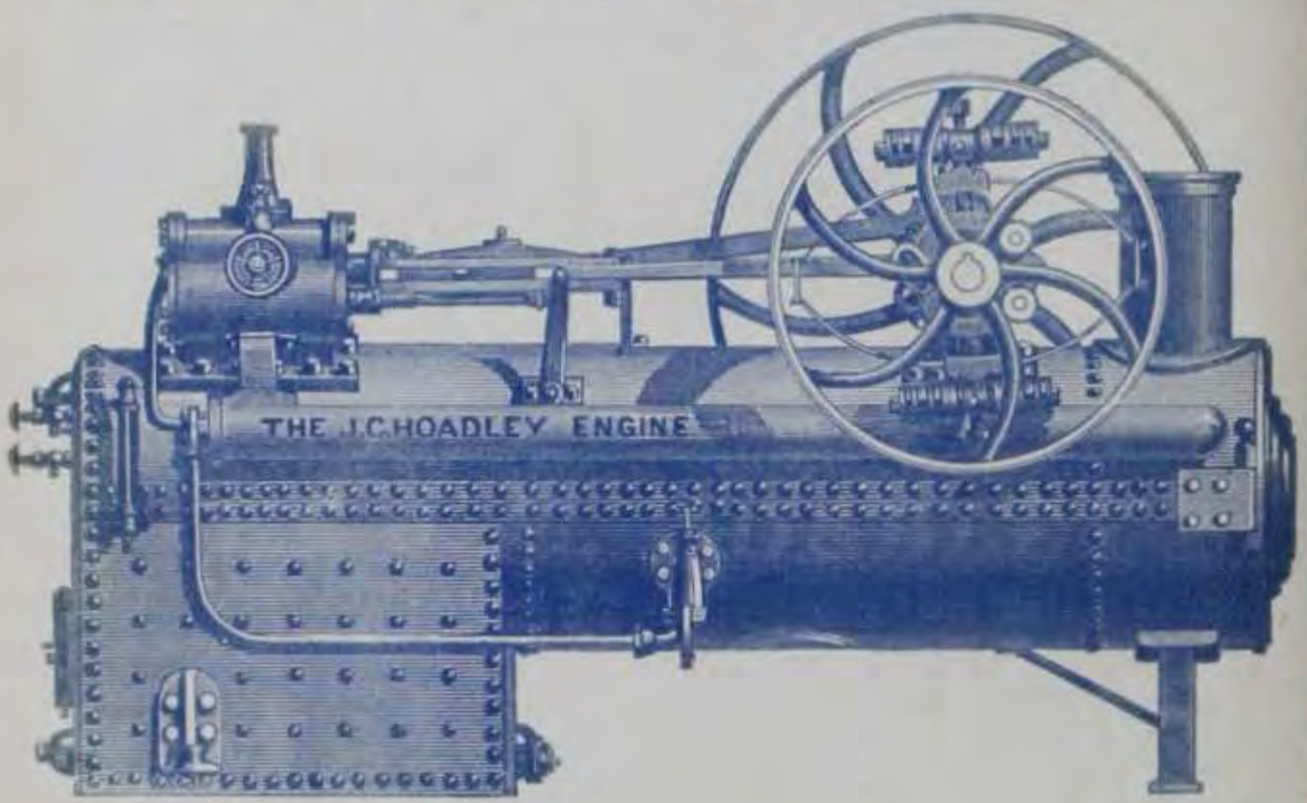
HOISTING WHEELS, HATCH COVERS, &c.

Our Freight Elevators are without a competitor in price for an Elevator of their class. They are very extensively adopted, and NONE are operated with better satisfaction.

The cut is imperfect, but gives a general idea as put up on the simplest and most durable plan.

We get them up in styles to meet all locations and uses.

THE J. C. HOADLEY



IMPROVED

Portable Engines.

All Sizes from 9 to 100 Horse Power.

(Covered by Five Patents.)

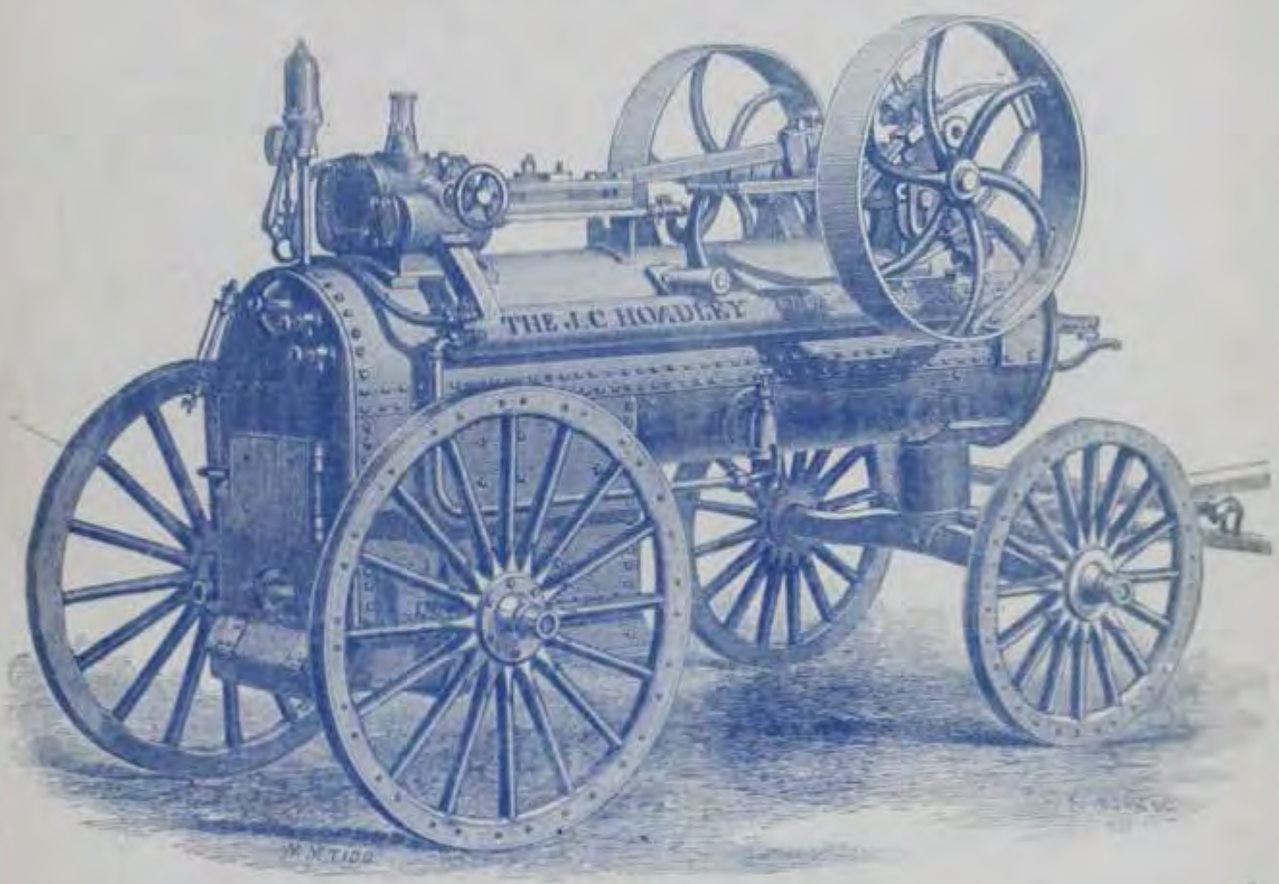
Made only by GEO. T. McLAUTHLIN & CO.

This cut shows the unmounted Engine complete, except the smoke pipe, with pump and regulator ready for use.

These wonderfully efficient and economical variable cut-off Engines have no competitors in economy of fuel and water, and in regulation of speed.

They are widely known and have attracted the favorable attention of many expert Steam Engineers, both at home and abroad.

At the Centennial, after most thorough and exhaustive tests, the HOADLEY PORTABLE ENGINE received the highest award, and the highest possible approbation of the Judges. See their official report, group No. 20.



We apply these improvements to the Old Style Hoadley, or to any first-class, strongly made Portable Engines, and guarantee ONE-THIRD GAIN IN POWER FROM THE SAME BOILER AND FUEL.

These Improved Hoadley Portable Engines are made with Automatic Cut-off Regulator, Balanced Valve, Steam Jacketed Cylinder and Valve Chamber, Direct Regulator Connection, &c., and require *only half the boiler, fuel, steam and water* of Mr. Hoadley's former noted Standard Portable Engines. They equal in average economy the best Stationary Engines and Boilers in general use.

BELOW IS A CUT SHOWING THE

MOUNTED ENGINE

COMPLETE,—EXCEPT THE SMOKE PIPE.

—WE ALSO MAKE—

STATIONARY HOADLEY ENGINES

UNDER THE SAME PATENTS.

They are not excelled in economy, are exceedingly simple, and of moderate cost. Their perfection of speed renders them valuable for

—ELECTRIC LIGHTS.—

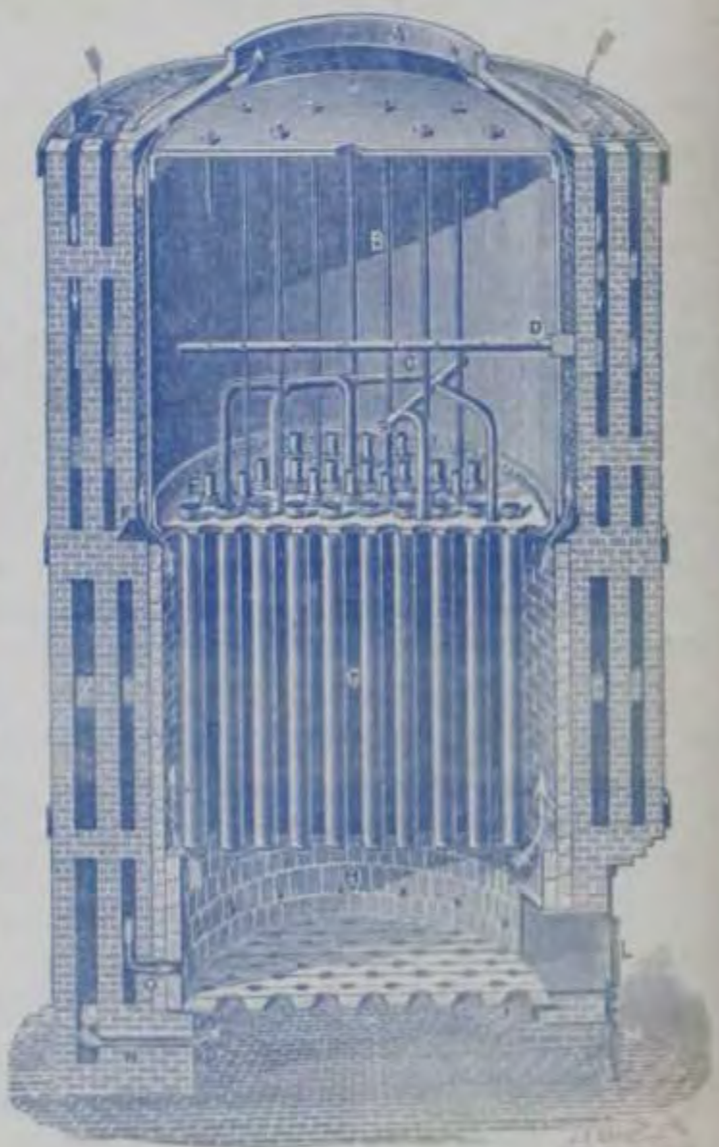
McLAUTHLIN'S

PAT. DROP-TUBE SAFETY STEAM BOILER,

COMBINING

Large steam and water space; perfect circulation; entire freedom from unequal expansion; ample heating surfaces; superior draft; suspension entirely within the fire-chamber; protected brick work, the supply of air passing down its air spaces, which also prevents waste of heat through it; manifold safety blow-off, which, combined with the enforced circulation, admits of using water that would prove dangerous in ordinary boilers; distributive safety feed, &c., &c.

These boilers have proved, by 13 years' use, remarkably economical and free from repairs or accident. They are made only of superior strength, materials, and workmanship, and are sold at about the cost of ordinary boilers.



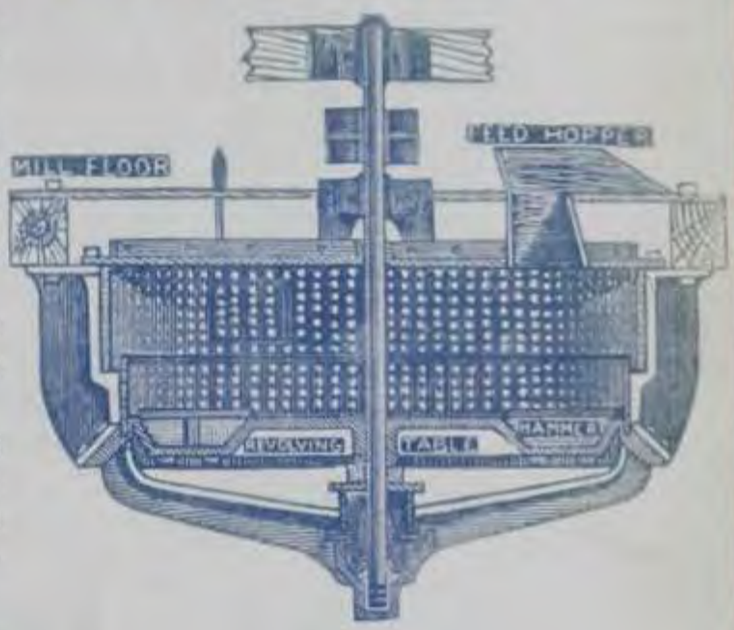
THE LARGE CUT IS A VERTICAL SECTIONAL VIEW.

A, central smoke flue; B, steam and water cylinder; C, water tubes projecting through the sheet; D, manifold blow-off, drawing from surface of crown sheet; E, distributive safety feed-pipe; F, supporting ring, having lugs on which boiler rests. Ascending arrows show boiler entirely enveloped in the fire and gases. Descending arrows show supply of air through brick work.

THE SMALL CUT

shows one of the tubes enlarged, the fire tube J K in section. Circulating tube E rests on contracting lugs on plug K, which is screwed into the large tube. The tube holder at the top sustains itself by spring pressure, and receives tube E loosely within it.

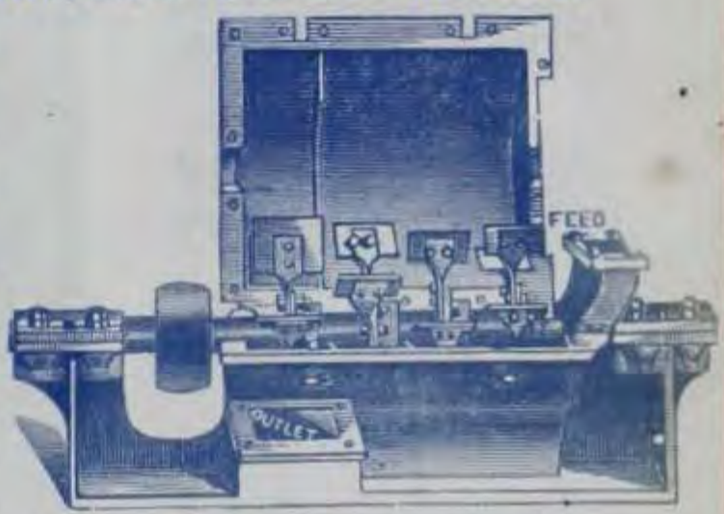
Fire Box Boilers and Ordinary Boilers Furnished at Short Notice.



THE PATENT MAGIC CRUSHER

Is adapted to all friable and most semi-friable substances. It consists of a revolving table with steel hammers attached, placed upon a vertical shaft and surrounded by a perforated casing within which it revolves and through which the crushed material is discharged.

The material thrown in receives at the rate of 5000 shattering or rending blows per minute.



No Crusher known works with less power or less wear and repairs. It crushes easily five tons an hour, and costs less than any other of similar capacity.

The cut is a vertical sectional view.

THE PATENT MAGIC PULVERIZER

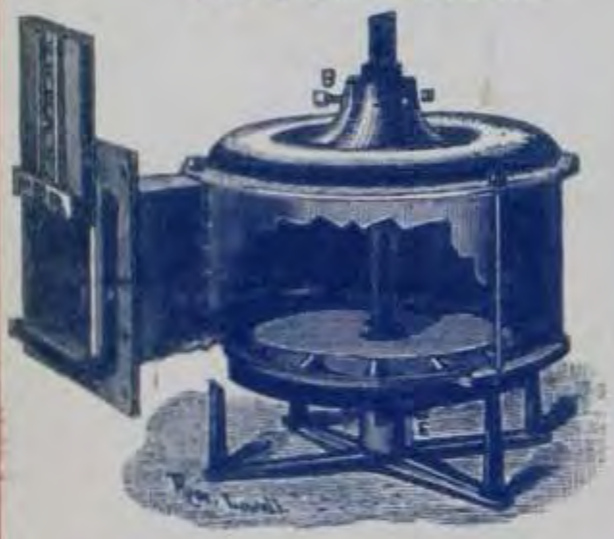
Has proved by years of practical work its superiority for pulverizing friable and semi-friable materials. No dressing or sharpening is required, and the wearing parts are easily replaced.

It consists of a horizontal cylindrical case, with a rapidly revolving shaft carrying steel paddles in the first part and exhaust-fans in the second, the combined operation of which creates concussive action of the grains upon each other in millions and in numberless repetitions, the material only escaping the combating vortices by the exhaust current, which is regulated for the fineness required.

It has been successfully used on a wonderful variety of materials, including ores, minerals, mica, glue, bones, asbestos, sugar, grains, dried roots, paints, chemicals, fertilizers, etc., and for GRANULATING corn, meal, glue, etc. It has also proved valuable for TRITURATING LIQUIDS.

The engraving shows a small machine thrown open to show the internal parts.

A hopper to be placed at the "feed" aperture conducts the material into the machine. The diaphram seen within the casing is proportioned for medium work: for coarse it is made narrower, and for fine, wider.



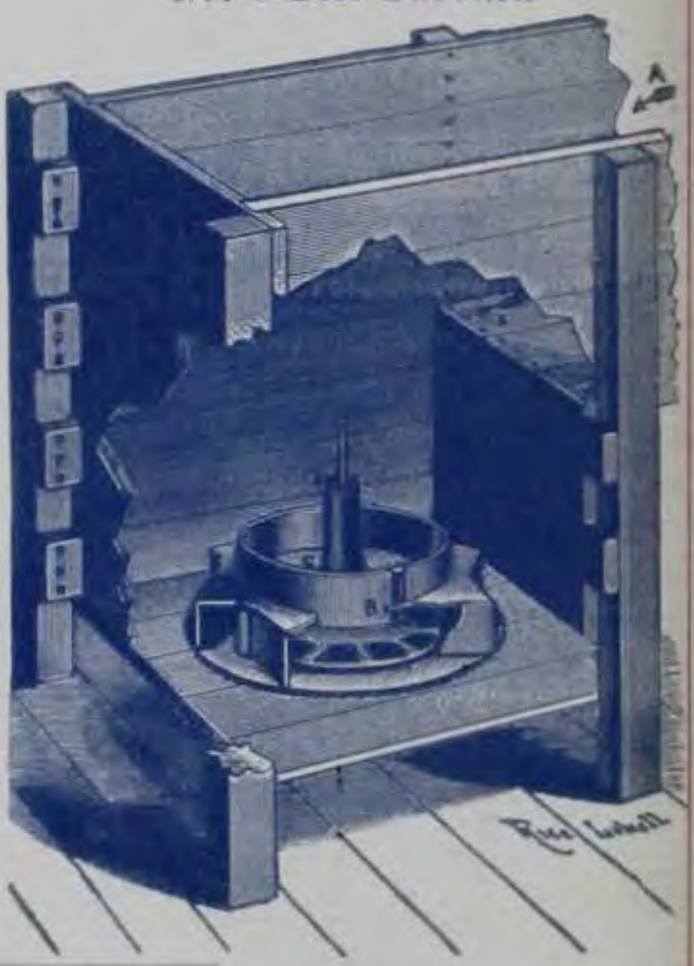
The rapidly revolving paddles to the right of it cause the attrition of the material, as it whirls from all sides, into the vortices they create. The exhaust-fan to the left of the diaphram draws the pulverized material through as fast as it becomes fine enough, and discharges it into a settling chamber to be connected to the pipe marked "outlet"

OUR TEST TURBINE WATER-WHEELS.

Over thirty years' experience in the Water Wheel business, and a series of 5300 of the MOST ACCURATE COMPARATIVE TEST EXPERIMENTS ON RECORD, have led to the production of our No. 1 and No. 2 TEST TURBINES.

We claim that for a term of years, working under the conditions that mills are generally subject to, the No. 1 *has not its equal in average economy of water, and freedom from care, interruptions or delays; and that the* No. 2 *is not excelled by any wheels that can be furnished and put in at so little cost.*

No. 2 Test Turbine.



In the No. 1, the water discharges under the flume bottom, on which the wheel is set.

The gate B C is open. It slides within the spout case, closing upon a seat at its rim, near the level of the wheel.

The No. 2 is in iron casing. Upper part of shaft is not shown. We also fit these with wood casing.

No. 1 Test Turbine.

BESIDES OUR SPECIALTIES HERE SHOWN, WE MAKE AND DEAL IN

Hydraulic and Screw Presses, Oil Mill Machinery, Steam and Centrifugal Pumps, Injectors, Shafting, Pulleys, Belting, Wire Rope, Blowers, Mills, Water Wheels, Engines, Boilers and General Machinery,

BOTH NEW AND SECOND-HAND.

We also make Iron Fences, Doors, Shutters, Vault Work, &c., and do General Machine, Blacksmith, Millwright, Pattern and Model Work, Power Forging, Large Planing, Turning, &c.

NEW ENDOWMENT PLAN.

An ORDINARY LIFE INSURANCE POLICY provides an estate for our dependants after our death, free from the claims of creditors.

An ORDINARY ENDOWMENT POLICY provides for death and also for one's advancing years, but at a heavy outlay.

The Manhattan NEW ENDOWMENT PLAN offers both advantages combined in one, and at a VERY MUCH REDUCED COST.

Superintendent, BROWN S. FLANDERS. Salary, $2,200, with use of horse and vehicle. He has also the care of all the public bells and clocks. Office, City Hall. [Appointed by the Fire Com'rs.]

Asst. Supt., Cyrus A. George. Salary, $4.50 per day. *Operators*, Charles M. Chaplin, Uzziel Putnam, James L. Crowley. Salary, $3.75 per day. *Foreman of Construction*, William H. Godfrey. Salary, $4.25 per day. *Repairers*, George S. Thom, $3.75 per day. J. M. Morris, $3.00. G. S. Mendell, $3.00. D. C. Freeman, $2.50 per day.

A constant watch is kept at the office, City Hall night and day, by the operators. An accurate account is kept of the time of giving each alarm, and of the station from which it originates. The police officers, and one other person resident near each station, have keys to the Boxes. Alarms are usually given in about half a minute from the time the Box is operated.

The ringing of the bells and the tapping of the Boxes, each denotes the number of the Station from which the alarm originated; thus.—one blow, a pause, three blows, another pause, and two blows (1—3—2) indicates that the alarm came from Box No. 132. Second alarms are sounded by striking ten blows followed by the box number. Third alarms are sounded by striking ten blows three times; if the entire department is wanted, alarms are sounded by striking twelve blows three times; Return Signal, notice will be given on the bells and gongs, one blow four times, thus: (1—1—1—1.) hearing which the several apparatus on the way to the fire will return to their quarters; (2—2) indicates no School; eleven blows indicates Police call; 189 indicates a call from Deer Island; 198 indicates a call from Chelsea.

The above-named railroads, when completed, form Divisions, or connecting links, in a Grand Air-Line Trunk Double-Track Railway between BOSTON and MONTREAL, over Massachusetts Central Railroad, via ***HOOSAC TUNNEL,*** *and Western Shore of Lake Champlain, over Delaware and Hudson Canal Co.'s Railroad; and also via Rutland, Burlington, and St. Albans, over Central Vermont Railroad. Also, between BOSTON and RUTLAND, Vt., via Hoosac Tunnel. Also, BOSTON and CHICAGO, via Kingston and Grand Trunk Railroad, Canada. Also, BOSTON and the great WEST and NORTH-WEST of the United States and Canada, via NORTHERN PACIFIC; also, CANADA PACIFIC RAILROADS, and thence to Pacific Coasts; and at BOSTON forming connection with a line of fast Ocean Steamers for Liverpool, London, Havre, Bremen, and other European ports, to make the passage across the ATLANTIC in from FIVE to SIX DAYS — Passenger Ships — and regular Freight Ships within seven and eight days' time.*

The new railways pass through a country comparatively new — wealthy in Iron, Marble, Granite and minerals; also, Lumber in abundance, while across Northern New York it is the Switzerland of America. New Boards of Directors have just been elected, most of whom are thorough business men, whose names will soon appear to the public.

(SEND FOR CIRCULARS AND PRICES.) **BELL TELEPHONE, No. 1577.**

The above depicts a very pleasant feature of bicycling as a sport. The club have ridden from their headquarters in the city, to a suburban village some twenty miles away, where they await the arrival of the racing members who were to start just thirty minutes later.

Five minutes more and the two foremost of the racing men—Fri, on his "Harvard," and Yonson on his "Yale," appear in sight. The pace is tremendous: the men are neck and neck, and Dodges, the captain of the club, whom you observe is leaning on his "Shadow" light roadster, in the foreground, declares the race a tie.

"Where are the other men?" he asks.

"Oh, behind, somewhere," is the reply.

"Are there any 'Harvard's' or 'Yale's' or 'Shadow's' among them?"

"Not one."

"Ah! that accounts for it," says the captain.

American bicyclers as a body will realize the force of the captain's last remark, but the thousands of new riders which the coming year will produce, should each one of them realize that the only true economy in choosing a bicycle is to be content with nothing less than the very best that money will procure. Each should find out all he can about bicycles before making his choice, and in order to assist enquirers in their search for information, we will, on receipt of a a three-cent stamp, send to any address, a copy of our large illustrated catalogue by return mail.

$75,000 TO LOAN ON FURNITURE.

We are prepared to make loans in large or small sums, in and out of the city. Household furniture, pianos, horses, carriages, etc., taken as security, only as a matter of form, as we take your note at a very low rate of interest, and leave the property with you. "All loans can be paid off in instalments if so desired." Loans made on city employes' wages. We do not publish our mortgages. All securities, such as diamonds, watches, gold and silver ware, wedding sets, etc., when left with us, are at once placed in our large safety vault. We are the only house in Boston that guarantees against fire or theft. We would caution the public against parties who represent themselves as capitalists, but are nothing else than brokers, who advertise to take up loans and carry them at a low rate of interest; their sole object being to get possession of the securities and sell them at a large profit. Any one who represents himself as connected with our office is an impostor, as we have no brokers connected with our house. Money always on hand for good second mortgages, which can be had at 5 hours' notice, saving the delay of days and weeks usual in such cases.

FELT ROOFING.

"BEE HIVE BRAND."

For Twenty-Nine Years the "Standard" in New England.

Guaranteed to possess every advantage claimed for any other Roofing, whether of Asphalt, or Coal Tar Materials.

TRADE MARK
ESTABLISHED
1852.
Incorporated
1865
Capital $60,000.

LEVI L. WILLCUTT, Pres't.
J. L. ROSS, Treas'r.

Experiments based upon *theories*, are unreliable in forming an opinion regarding the durability of any Roofing.

The only satisfactory and reliable test of a Roofing Material, is in the actual wear, after exposure to the elements for a series of years.

Samples of the "BEE HIVE BRAND ROOFING," *in wear for over twenty years*, can be seen at the office of the manufacturers, giving *proof positive* of its durability.

For more than a Quarter of a Century the "BEE HIVE BRAND ROOFING" has been used for covering the most elegant Residences, many Public Buildings, and the finest Stores and Warehouses in Boston and elsewhere.

The year succeeding the great fire of 1872, upwards of *Twenty Acres* of this roofing was placed upon new buildings erected in the Burnt District.

The Organization established by this Company, for the forwarding of the business in New England and elsewhere, is continued. Reliable, Practical Roofers, using only the genuine material, are located at all important centres, prepared to execute orders with the greatest promptness and by the most approved methods.

Surgical and Dental Instruments,

Self-Propelling Chair for Invalids.

Besides a complete assortment of articles intended for the exclusive use of the Medical and Dental professions, have always in store, at the lowest prices, a great variety of the following articles, suited to the wants of the general public:—

Anti-Dust Respirator,
For Workmen in Paper Mills, Factories, Etc.

TRUSSES.

A LARGE ASSORTMENT OF BEST PATTERNS from which to select, to meet the requirements of each case. If convenient, persons requiring Trusses should call at our establishment, where they can have a suitable Truss carefully fitted by a competent and experienced person familiar with the anatomy of hernia. When a call in person is impracticable, a careful description should be sent, stating whether the rupture is on the right or left side; also the measure around the person, two inches below the top of the hip bones. If the rupture is at the navel, the measure should be around the body at the navel.

N.B.—Ladies attended by those of their own sex.

ELASTIC HOSE,

For Varicose Veins, Swollen Limbs, and Weak Joints. Of these goods we have several classes of silk and cotton, possessing different degrees of elasticity; the stout silk being usually the most satisfactory. The sizes are full length (of leg), three quarters, half or knee hose, knee caps, and anklets. Unusual sizes made to order. Also,

STEAM AND HAND ATOMIZERS IN GREAT VARIETY.

NASAL DOUCHE,

Elastic and Spring Abdominal Supporters, Shoulder Braces, Suspensory Bandages, Apparatus for Weak Ankles, Bow-Legs, Club-Feet, Etc. Also, Crutches of various and most improved kinds; Syringes, Rubber Urinals to wear on the person day or night, for Males and Females; Galvanic Batteries, Hearing Trumpets, Auricles, and Conversation Tubes for the Deaf; together with many other articles for the use of the Sick and Invalids.

A GOLD MEDAL has lately been awarded us by the Middlesex Mechanics' Association, as will be seen from the following report, signed by a leading New England Surgeon and Physician:—

"**1503.** CODMAN & SHURTLEFF, Boston, Mass. One Case Surgical Instruments and Atomizers.

"The Committee have no hesitation in awarding for this superb exhibition the highest premium. * * * The various other instruments for inhalation of atomized liquids, and for Local Anæsthesia, were all apparently faultless, both in design and workmanship. The exhibitors are regarded as more especially deserving of the highest token of merit for having produced nothing except their own manufacture.

GOLD MEDAL. (Signed), GILMAN KIMBALL, M. D., Chairman."

THE IMPROVED COMFORT CORSET.

"NO BONES TO BREAK."

Ladies once fitted with this Corset will wear no other. Be sure and get the COMFORT CORSET. Do not be put off with another kind of Corset.

Stylish and Tasty as a French Corset, yet combining ease and comfort with elegance and shape.

In the place of bones we insert continuous rows of very stiff cord, which give all the support of bones with the advantage of yielding to every movement of the form, and of being washed without changing the fitness of the garment.

The whole burden of the clothes is transferred to that part of the shoulders best adapted to sustain its weight.

E. R. HUMPHREYS, LL.D.,

Formerly of Cambridge University, Author of various Classical Works, for which see Duykinck's Encyclopædia.

DR. HUMPHREYS has, under the new system at Harvard, been even more successful than formerly with his pupils, two of whom were admitted with DOUBLE HONORS in July, 1880. He reads with ladies, as well as young men, and undertakes to prepare for College, *in two years*, any youth or young lady who has had a good *English* and *Mathematical training* with an earnest purpose, and who *will implicitly follow his advice.* He is in constant communication with Professors and Fellows of Colleges at Oxford, Cambridge, London and Edinburgh, and is thus kept *au courant* with all changes in books and Examinations at these Universities. Three boarding pupils, *giving thoroughly satisfactory references as to disposition and character*, are received. In the SUMMER VACATION Dr. Humphreys reads with Teachers seeking promotion, and College pupils during *nine weeks.* Terms can be learned on application to

S. D. HICKS & SON,

COPPERSMITHS

AND MANUFACTURERS OF

SHEET METAL CORNICES, MOULDINGS & ORNAMENTS, OF COPPER & GALVANIZED IRON.

WE MAKE A SPECIALTY OF

Austin's Patent Expanding Water Conductor, or Rain Water Spout, for which we are the Sole Agents for Boston and vicinity.

Its merits need only to be known to be adopted, as the increase of our yearly sales indicate. It is the ORIGINAL and ONLY legitimate Expanding Conductor in the market, and is warranted not to burst by freezing. It is made from the best of Iron and Galvanized after it is made, thereby filling the seams and galvanizing every part thoroughly. Metal workers will see the advantage of this, on account of the galvanizing not being broken and leaving the iron exposed, as is the case with conductors made from the sheet and put through a machine. It has no loose seam to leak or strain apart. It comes in nine-foot lengths, fitted for loose joints or soldering, and elbows that can be used for goose necks or offsets and shoes. Sizes, 2 to 8 inch diameter. The price will be kept as low as possible. List and samples sent on application.

BOSTON.

This Company beg leave to call the attention of Cities and Towns wanting a **Superior** Street Light, to their facilities for furnishing the same.

Being owners and lessees of valuable patents used in this business, which together with the low price of fluid, enables them to guarantee a light exceeding in brilliancy and cheapness of price anything heretofore attempted. They particularly call the attention of all interested to the fact that the light supplied by this company is **permanent,** not subject to being easily extinguished by the wind or by defects in the lantern, a matter of great importance in lighting streets. Contracts made for one, three or five years, as committees may desire.

The long experience of the officers of this Company in lighting streets with gasoline, warrants them in promising faithful work and prompt attention.

ANDERSON'S AUTOMATIC
WINDOW SASH BALANCE
And Flexible Stop Beads.

Preventing any binding or shaking of the sashes, keeping out wind and dust. By pressing a spring lock the sash immediately opens to the top, and by drawing down will stay, and when closed is self locking and burglar proof, and will last for years.

Doing away with Weights, Cords, Pulleys, Lifts and Sash Fasts, and Weather Strips, and costing less than the old method. Needs only to be seen to be appreciated.

These Sash Balances are fitted with Patent Steel Spiral Springs which will last INDEFINITELY and are GUARANTEED in every case. The Heavier the Sash the better.

THE RICHARD SMART
CARPET BEATING COMPANY

REMOVED TO

No. 6 Brighton Avenue, junction Beacon Street.

An entire new building, with two airy rooms for Cleaning Carpets, a brick boiler house, containing a 20-horse-power Steam Engine, makes this the foremost establishment of the kind in the New England States.

With our new Carpet Beating Machine, the **Invincible**, just patented by Church & Dow, we are prepared to give our customers quicker and better work than heretofore.

Being established in 1852, near where the Public Garden now is, and when that now beautiful locality was a swamp, covered with cat-o'-nine tails and peopled with bull frogs, and when up and down Commonwealth Avenue, Marlboro' and Newbury Streets that now are, the boys busied themselves shooting plover or spearing eels, having had to move *eight* times to make way for the march of improvement, and reach our present location, we think have fairly earned the reputation of being a Back Bay Institution, and the "Star" Carpet Beating Establishment of Boston.

Expresses from Jamaica Plain, Newton, Newtonville, Brighton, Watertown, and Brookline pass our door daily, giving our suburban customers a chance to get their Carpets Cleaned and returned the same day, a privilege they are fast finding out.

All orders by Postal Card or otherwise promptly attended to. Address as above.

We would specially call the attention of the public to our system of heating by Indirect Radiation, by which one-third, two-thirds, or all the heating surface may be used as the severity of the weather requires, thus securing an adjustment of heat that cannot be obtained by the old indirect system, whereby all the heating surface must be used or none at all; thereby causing the overheating of rooms when but little heat is needed, and proving inadequate to the necessities of severer weather.

Automatic House Pump.

CHARLES HOUGHTON, Patentee.

Operated by the surplus heat of the cooking range without interfering with ordinary use, and without additional fuel or any attention whatever, it will draw water from the well or cistern, and force it to the storage tank at the top of the house, enough for all ordinary household uses, including baths, water closets, &c. It has no machinery or working parts subject to friction or wear.

Five years' constant use has fully demonstrated its reliability and usefulness, and it is fully warranted as represented. It is sold, ready to put up, at **$225**, and competent workmen to put it up ready for use will be furnished at a reasonable charge.

SOLD BY ALL RELIABLE PLUMBERS.

PATENT SELENITIC CEMENT COMPANY,

Medals awarded at the International Exhibition, London, 1874. Philadelphia, 1876. Universal Exposition, Paris, 1878. Mass. Charitable Mechanics' Fairs, 1878, and Gold Medal 1881. Raleigh, N. C., Fair, 1879.

Patent Selenitic Cement is used as a mortar for general brickwork for plastering, and for concrete. Being thoroughly hydraulic, it is well adapted for water works, and is suitable for railroad and engineering works in general. When used in conjunction with common mortar in equal proportions, its tensile strength is increased two-fold over that of common mortar alone. In the Government Testing Machine at Watertown, Mass., a fire-proof block showed a test of compression equal to 662 lbs. per sq. inch, without breaking.

EUREKA VENTILATION COMP'Y

FREDK. O. PRINCE, Pres. **81 HIGH STREET, BOSTON.** THEO. A. DODGE, Treas.

The **Eureka Ventilator** has been largely used in Boston and vicinity for ten years, and has met with universal approval. It has been introduced into more than one hundred public school-houses, twenty churches, thirty halls and public buildings, and numberless private residences. As many as sixty ventilators have been put into a single building. It has been adopted for some of our most costly edifices, such as the Art Museum, New England Mutual Insurance Building, etc., and can be found in a number of inexpensive houses, as well as in stables. It is the cheapest as well as the most effective device. It is particularly valuable in the crowded rooms of factories. It is universally commended by architects who have once used it, and we can confidently refer to any person having tried it.

The **Eureka Ventilator** consists of a cast-iron box of peculiar shape, traversing the wall of the building to be ventilated from outside to in, and fitted with an outer screen, an inner regulator and an interior damper. This device secures a gentle flow of air into the apartment, with such an upward cast as to prevent any draught, and the air is distributed over a large area within a short distance from the regulator. There can be added, in buildings which are peculiarly difficult to ventilate, or which are apt to be overcrowded, a roof device to add to the outflow of foul air. But in almost all cases the Eureka Ventilator secures an equilibrium of the incoming and outgoing currents which perfectly answers all ends.

The **Eureka Ventilator** is covered by Letters Patent which have been sustained in an infringement suit before Judge Lowell. Among the advantages of the Eureka Ventilator may be mentioned the following: It is very simple in construction, having no levers, slides, springs or complicated parts liable to derangement. It cannot get out of working order. It is very durable, as permanent as the building of which it becomes a part, and will outlast the walls. It is easily applied, sets firmly in its place, and cannot be disturbed by a force less than would destroy the building. It is fire-proof and storm-proof. No fire, water or frost can injure it, or interfere with its working, or enter the building through its agency. It is very effective, though gentle in action. There are no rushing currents or dangerous draughts produced, either upwards or downwards, but simply a gradual and imperceptible change of air. In railroad cars it will admit the air and keep out cinders and dust. In vessels it will give free entrance to the air, while it prevents the water from finding its way in, and it will shortly be so practically tested on a large scale. It is made in all sizes, and to fit any thickness of wall, or in any place. It is recommended by all architects, school-teachers and custodians of public buildings. In private houses it is the greatest boon. We confidently refer to any one who has ever used our Ventilators.

THE

"CENTURY" BLIND FAST.

(PATENT APPLIED FOR.)

HAS ADVANTAGES OVER ALL OTHERS.

1—It holds securely at any angle, *and locks* when shut.
2—It strengthens the blind, prevents sagging, and old blinds already sagged out of shape can be repaired by it.
3—It can be applied *without the aid of a mechanic;* you have simply to screw the fast on without cutting or fitting the blind for it.
4—It will work on all kinds of blinds and shutters (doing away with back ketch, so difficult to fit, especially in brick or stone, and so liable to get out of order).
5—It is neater and by far less liable to get out of order than any other fast in the market. Parts, if broken, can readily be replaced at trifling cost.
6—It is peculiarly well fitted for blinds where exposed to winds and storms, and to all sea-side dwellings, and windows opening on piazzas.
7—Blinds *cannot be thrown off*, endangering life as well as damaging property.

Price, Coppered, 25 Cents. Japanned, 30 Cents. Galvanized, 35 Cents; add 6 cents for sample mail orders (not cost).

These goods will be offered through the Hardware and other Jobbing *trade*, and fair prices and fair discount will be given.

Preparation for Harvard University,

—AND FOR—

OXFORD AND CAMBRIDGE UNIVERSITIES,

—BY—

E. R. HUMPHREYS, LL.D.,

Formerly of Cambridge University, Author of various Classical Works, for which see Duykinck's Encyclopædia.

DR. HUMPHREYS has, under the new system at Harvard, been even more successful than formerly with his pupils, two of whom were admitted with DOUBLE HONORS in July, 1880. At the September examinations of 1881, besides the usual success of his own regular pupils, two candidates who were rejected in July were creditably admitted, after reading diligently with him during the vacation. The total number of Harvard students successfully prepared by him up to last September was 127, and in all the four present classes of Harvard there are members of good rank trained by him. He reads with ladies, as well as young men, and undertakes to prepare for College, *in two years*, any youth or young lady who has had a good *English and Mathematical training* with an earnest purpose, and who *will implicitly follow his advice*. He is in constant communication with Professors and Fellows of Colleges at Oxford, Cambridge, London and Edinburgh, and is thus kept *au courant* with all changes in Books and Examinations at these Universities. Three boarding pupils, *giving thoroughly satisfactory references as to disposition and character*, are received. In the SUMMER VACATION, Dr. Humphreys reads with Teachers seeking promotion and College pupils during *nine weeks*. Terms can be learned on application to

MAY 12th, 1882. The next yearly session begins Sept. 28th, 1882. } **E. R. HUMPHREYS, LL.D., 129 W. Chester Park, Boston.**

Is, after all, the most perfectly delightful of the many enjoyments which only the lordly wheel can claim. Fortunate, indeed, is he, who, secure in the possession of his sturdy "Harvard," or speedy "Yale," or symmetrical "Shadow," rises with the lark, straps on his "Multum" or his "Takeabout," and leaving the city to its awakening toil and turmoil, glides swiftly out into the purer air and more healthful life beyond. The winding lanes, the sleepy villages, the broad stretches of open country, all develop hitherto unsuspected beauties under the health-giving exercises of the wheel. Are you content with *reading* this, or will you realize it practically? If the latter, be careful in choosing your bicycle, that you are content with nothing less than the very best that money can procure. You may feel assured that it will prove the truest economy in the end. Find out all you can about bicycles before you make your choice, and if you will send us a three-cent stamp, we will aid you in your search for information, by sending you our large illustrated catalogue by return mail.

THE McLEOD RAILWAY AIR SIGNAL CO.

OFFICES: 31 Milk St., Boston, Mass. Hartford, Conn., and New York.

This is the only Signal known to combine simplicity, accuracy, reliability and efficiency for all kinds of automatic signals required to indicate approach and moving of trains upon railroads.

The use of the interlapping Block Signals will prevent two trains wrecking each other on the track and killing occupants; and at crossings or stations a large sign is moved to view with inscription, "*Train coming,*" etc.; and a gong repeatedly sounded from the time a train approaches within about one-third of a mile until it has passed the signals.

It requires no manual attendance, nor chemical nor electrical appliances; simply the pressure of the first car wheel passing over an inclined bar, placed by the side of the rail, forces common air from a bellows, through an underground composition pipe, which at the other end sets the desired signals. It has been thoroughly tested, by practical operation, for several years, on railroads, and improved and perfected, to the entire satisfaction of the many railroad men who have examined it, and who, with newspaper men, do not hesitate to commend it as being all that is claimed for it.
